

smart dt301 manual

smart dt301 manual pdf -
The HCC301 can be used with the FY301 control valve positioner to get an actual valve position feedback current signal for the DCS or PLC. The control strategy can therefore detect a stuck control valve improving safety, provide bumpless transfer all the way down to the valve minimizing process upsets, can be used to detect hunting or sluggish valve performance etc. HCC301: Hart to Current Converter | SMAR - Industrial ... -
